## WORK EXPERIENCE

### Senior Full Stack Engineer

Hyly.AI

09/2023 - 11/2025

United States

Achievements/Tasks

- Built a drag-and-drop customer email marketing playground using **React.js** and **Material UI**, enabling faster and more intuitive campaign creation
- Implemented **AI-powered assistance** for email content generation and optimization, improving personalization and campaign performance
- Debugged and enhanced core platform services to increase reliability, performance, and user satisfaction
- Collaborated with Product Managers, designers, and engineers to iterate on features, improve UX, and deliver data-driven enhancements

### Full-Stack / Web3 Engineer

SPACE ID

02/2021 - 08/2023

United States

Achievements/Tasks

- Developed and maintained Web3 applications using **React**, **Web3.js**, and **Ethers.js**, ensuring reliable interaction with smart contracts on **BNB Smart Chain**
- Implemented **smart contracts** for domain registration and management, including deployment, testing, and frontend integration
- Built secure on-chain workflows for domain registration, ownership validation, and transaction handling
- Worked closely with cross-functional teams to optimize performance, usability, and blockchain reliability

### Front-end / Web3 Engineer

Hi

03/2019 - 12/2021

Estonia

Achievements/Tasks

- Contributed to the development of a **web-based user wallet**, enabling secure and intuitive interactions with blockchain assets
- Maintained and enhanced a **staking platform**, fixing frontend issues and improving reliability and user experience
- Integrated frontend components with **staking smart contracts**, supporting on-chain staking, rewards tracking, and wallet interactions
- Collaborated on updating UI layouts, styles, and application behavior to align with evolving product and business requirements
- Worked closely with blockchain and product teams to deliver stable, user-friendly Web3 features
